

RUST-SUPPORT FOR YOUR TEAM

Thank you very much for your interest in my consulting services for Rust projects!

My name is Matthias Endler, and as an experienced Rust developer and open source maintainer, I support your team in the introduction and implementation of software built with Rust. My goal is to help you use Rust effectively in your company. This entails hands-on training, strategic consulting and the development of idiomatic Rust code.

This document contains an overview of my offerings and the next steps for a potential collaboration.

I look forward to supporting your team in using Rust!

ABOUT ME

I have been active in the Rust community since 2015 and am enthusiastic about the language, its community and its ecosystem. I have been bringing Rust applications into production for various companies since 2019 and can support you achieve the same.

HOW I WORK

What sets my consulting apart:

- **Collaboration:** I work closely with your team and adapt to your processes.
- **Practicality:** I focus on practical solutions that create real added value.
- **Knowledge transfer:** I ensure that your team learns and grows with every project.

MY OFFERINGS

Architecture Audit

- At the start of your Rust project, I offer a comprehensive audit.
- We analyze your team structure and project goals to develop an optimal software architecture.
- This session lays the foundation for a successful Rust project and ensures a unified understanding within the team.

Introduction to the Rust Ecosystem

- I introduce you to relevant libraries (crates) for your project as needed.
- You'll get an overview of proven tools and practices in the Rust community.
- Together, we'll work out how to effectively use these resources in your project.

Ongoing Support

- I'm available to your team via Slack or Microsoft Teams.
- I'm here to promptly address any questions or issues.
- This allows us to quickly tackle challenges and ensure project progress.

Code Reviews and Best Practices

- I conduct regular code reviews to optimize the quality and efficiency of your Rust code.
- We'll develop tailored best practices for your project together.
- This not only promotes code quality but also expands the team's competencies.

Flexibility

- My support adapts to your team's needs and pace.
- Whether you need intensive guidance in the initial phase or just occasional consultation - I'll accommodate your needs.

EXPERIENCE AND EXPERTISE

My many years of experience in Rust development include:

- Guiding a multitude of German and international companies in the introduction and optimization of Rust projects
- A wide spectrum of client projects: from GraphQL applications to FinTech solutions, communication protocols (Matrix), and critical infrastructure
- Development of popular open-source projects such as tinysearch, hyperjson, and lychee, used by leading technology companies like Google, Microsoft, and Amazon
- Regular presentations at renowned professional conferences
- Host of the podcast "Rust in Production", where I discuss experiences with Rust with decision-makers

PRICING STRUCTURE AND AVAILABILITY

To offer you maximum flexibility, I work in half and full days:

- 2 half days / month (4h/week, 16 hours total): 2,400 Euro plus VAT
- 4 half days / month (8h/week, 32 hours total): 4,800 Euro plus VAT
- 8 half days / month (16h/week, 64 hours total): 9,600 Euro plus VAT

My current maximum availability is 2 days per week. This allows me to focus intensively on your projects while ensuring high-quality support.

Flexibility and Adaptation

- Invoicing is done on a monthly basis.
- You can adjust your weekly commitment level at the start of each month.
- This arrangement provides both predictability for planning and flexibility to scale up or down as needed.

Short-term Adjustments

- Consulting is typically done remotely
- More intensive project phases, longer-term agreements, or project-specific packages are possible by arrangement

I recommend starting with a half or full day per week and adjusting the intensity as needed. This way, we can optimally adapt the support to your project requirements.

Together, we'll create the foundation for robust, efficient, and future-proof software projects.

CONTACT

Please feel free to contact us if you're interested in our Rust consulting or if you have specific questions. We're happy to help, whether you're just starting with Rust or looking to deepen your knowledge. Our goal is to provide you with a solid learning experience based on practice and direct support.
